

Backup for Microsoft 365

A feature available with SolarWinds Backup

SolarWinds® Backup for Microsoft 365™ is designed to help you protect Microsoft 365 users from data loss. Backup for Microsoft 365 helps you retain and restore Exchange™, OneDrive®, and SharePoint® data—and you can do it from the same web-based dashboard you use to protect servers, workstations, and critical business documents.

PROTECT MICROSOFT 365 FROM THE SAME DASHBOARD AS SERVERS AND WORKSTATIONS

- » Save administrative time every day by checking status and managing backups in one place.
- » Improve backup management efficiency with at-a-glance status views and one-click drilldown reports.
- » Show backup status across customers and devices and data types with a clean, web-based console.

RETAIN AND RECOVER CUSTOMER DATA

- » Help customers meet retention and regulatory requirements with data storage in your choice of more than 30 worldwide data centers.
- » Retain and recover Microsoft 365 Exchange email, calendars, contacts, and tasks for seven years.
- » Retain and recover Microsoft 365 OneDrive data for one year.
- » Retain and recover Microsoft 365 SharePoint data and permissions

CLOUD DATA STORAGE INCLUDED

- » Cloud storage in your choice of more than 30 worldwide data centers is included in your price*.

RECOVER AS NEEDED, INDEPENDENT OF MICROSOFT SUPPORT

- » Equip yourself to respond to customer requests without reliance upon Microsoft support responsiveness.
- » Back up Microsoft 365 Exchange every four hours.
- » Back up Microsoft 365 OneDrive every six hours.
- » Back up Microsoft 365 SharePoint (including Teams files and data that are stored in SharePoint) every six hours. Custom and sublibraries are backed up and can be recovered individually as needed.

EXTEND AND MODERNIZE YOUR DATA PROTECTION SERVICES OFFERING

- » Keep your data protection services up-to-date as your customers adopt Microsoft 365.
- » Continue to add value as your customers' SaaS application usage evolves.
- » Don't lose customers to competitors that offer broader data protection services.

Please note that Backup for Microsoft 365 is currently available only in the standalone and N-central® integrated versions of SolarWinds Backup.

*Fair use policy includes up to 1TB of Microsoft 365 data per user.
